

Amendment to August 1, 2015 LAPOA Board Minutes

It was discovered after the minutes were approved that a section was missing from the August 1, 2015 Lake Arrowhead Property Owners Association board meeting minutes.

The following section should have been included:

Website and Technology: Dwayne Crocker reported that the wifi access currently hosted by Scott Bicknell will soon be taken down. Dwayne presented the board with information and recommendations for improving our security and for creating wifi access for our members. After much discussion the consensus was that we should manage our wifi network and actual deployment locations of cameras and authorized accessibly will need further discussion.

Dwayne moved to proceed with investigating the feasibility and costs associated with a community wifi network which would be installed in specified areas of our common grounds as an amenity for our members. Judy seconded the motion and it passed unanimously.

Ron Race Sr. moved to authorize Dwayne to spend up to \$1200 as part of his investigation into the establishment of the wifi service. Anita seconded the motion and it passed unanimously.

Submitted by Mary Davignon, LAPOA Secretary
